SKILLS

- C#, OOP, SOLID
- Unity (Zenject, UniTask, UniRx)
- SDK Integration
- Mobile optimisation & profiling
- Android/iOS/Amazon platforms
- REST API, A/B Testing
- GIT, CI/CD
- Math, Linear Algebra
- Game Design & Prototyping
- Editor Tooling
- Agile / Scrum
- Code Review
- Shader Graph
- AWS Service (S3, CloudFront)

LANGUAGES

- English - intermediate
- Ukrainian - native
- Russian - native

EDUCATION

2020 - 2025

MASTER OF COMPUTER ENGINEERING

- National Technical University of Ukraine "KPI"

K-SYNDICATE COURSES

PROFILE INFO

Unity Developer focused on hyper-casual and hybrid-casual mobile games. I enjoy digging into gameplay systems, optimizing performance, and finding smart ways to boost player engagement. I've integrated ads, analytics, and IAP SDKs, implemented WebView features, and run A/B tests to refine monetization. By adding battle passes and new game modes, I helped increase LTV by about 23% across projects. Experienced with Android, iOS, and Amazon platforms, I work closely with designers and artists to turn ideas into fun, polished mobile games.

EXPERIENCE

VIRA GAMES

2025 - now

I was responsible for developing core meta-game features, including creating data models, writing business logic, implementing interfaces, and performing A/B testing to optimise gameplay and user experience. I worked across multiple projects with different codebases and programming approaches, and also handled porting games to the Fire TV platform. Collaborating closely with game designers and artists, I ensured features were implemented efficiently and aligned with the overall game vision.

Key Achievements:

- Developed the package to automate tasks across projects, reducing development time and increasing efficiency.
- Implemented feature and optimisation, enhancing product quality, improving user experience, and increasing LTV by 23%.

Tech: Unity, C#, Zenject, UniRx, Odin Inspector, SDK, Editor Tooling, Agile, Addressables, S3, CloudFront

PLAYNATIC

2024 - 2025

Develop straightforward game mechanics that are intuitive and quick to understand, ensuring the game is easy to pick up for casual players. Implement basic monetisation strategies like ads and integrate analytics tools to track player behavior and optimise the game's success post-publishing.

Tech: Unity, C#, Zenject, DOTween, AppsFlyer, OneSignal, Xcode

24PLAY

2023 - 2024

Developing game mechanics implement and fine-tune core game mechanics, including puzzle mechanics, stacking mechanics, merge mechanics, idle tycoon.

Create rapid prototypes of game concepts*Work closely with designers and artists to integrate assets into the game.

Tech: Unity, C#, Zenject, DOTween, UniTask, Optimizations, Ads, In-App, Analytics,
