SUMMARY

Unity Developer with 3.5 years of experience building mobile F2P games – casual, and hybrid-casual – for Android, iOS, and Amazon. Shipped and supported live titles including Street Dude (5M+ downloads on Google Play), built rapid prototypes to validate gameplay hypotheses, integrated ad/analytics/IAP SDKs, and ported live projects across platforms with constant performance optimisation for low-end hardware. Comfortable working in unfamiliar codebases and shipping features fast into existing projects.

SKILLS

- C#, OOP, SOLID, ECS, Design Patterns, Data Structures, MVP, MVVM, Java
- Zenject, UniTask, UniRx, DOTween, Addressables, AssetBundles, UGUI, Shader Graph, Editor Tooling, Odin Inspector, Game Math, Physics, performance profiling & memory optimisation for low-end devices
- Claude Code, Cursor
- Ads, IAP, Analytics, AppsFlyer, Firebase, OneSignal, A/B Testing, Battle Pass / subscriptions flow
- REST API, UnityWebRequest, WebView integration
- Git, Xcode, Android Studio, Agile/Scrum, Code Review, AWS (S3, CloudFront), CI/CD, Jenkins

WORK EXPERIENCE

Vira Games - Unity Developer | Feb, 2025 - now

Tech: Unity, C#, Zenject, UniRx, UniTask, ECS, Odin, Addressables, AWS, CI/CD, AI Tools

- Ported live titles to the Amazon platform, adapting input handling, and store/SDK integration
- Optimised ported games for low-end hardware: reduced memory footprint and stabilized frame rate using Unity Profiler & Memory Profiler, Frame Debugger
- Supported multiple live projects (LiveOps) with different codebases and architectures, shipping features fast into unfamiliar legacy code
- Implemented subscription monetization (battle pass) and new game modes, contributing to a ~23% LTV increase across projects
- Built an internal Editor tooling package automating cross-project tasks, reducing repetitive setup time
- Adopted AI-assisted tools for boilerplate generation, refactoring, and debugging – speeding up feature delivery across unfamiliar legacy codebases

Playnatic - Unity Developer | Apr, 2024 - January, 2025

Tech: Unity, C#, Zenject, Rest API, DOTween, AppsFlyer, OneSignal, Xcode, UnityWebRequest, WebView

- Developed gameplay prototypes for casual titles, integrating ad, analytics, and push SDKs (AppsFlyer, OneSignal) for monetization and retention testing.
- Implemented WebView features via UnityWebRequest to serve remote content and offers inside the app

24Play - Unity Developer | Jan, 2023 - March, 2024

Tech: Unity, C#, Zenject, DOTween, UniTask, Addressables, Ads, IAP, Analytics

- Contributed to Street Dude (5M+ downloads on Google Play): implemented core gameplay mechanics and meta-game features
- Built rapid prototypes to validate gameplay hypotheses and identify scalable, high-retention mechanics
- Integrated a wide SDK stack (ads mediation, IAP, analytics) and ran A/B tests to refine monetization
- Worked across a large technology stack, implementing intuitive, easy-to-pick-up mechanics for casual players

EDUCATION

- Master in Computer Engineering – National Technical University of Ukraine "Igor Sikorsky KPI" 2020 – 2025
- K-Syndicate – ECS | ARCHITECTURE UNITY GAMES

LANGUAGE

- Ukrainian – Native
- English – B2 / Upper-Intermediate
